SPOOL COTTON. THE GREAT ATTRACTION AT THE ATLANTA COTTON EXPOSITION

UNIFO

The manufacturers of this Spool Cotton have now put in motion their New Automatic Spoonery, one of the greatest mechanical marvels ever produced. One of these machines will spool or wind over six thousand spools of cotton every day, It spools or winds EIGHT spools of cotton at a time. t lifts up the 8 empty spools, fastens the thread on each speck, and measures out the 200 yards on species at the same time. When it has wound and measured the 200 yards, it then cuts the thread on each of the 8 species They will also introduce to the public for the first time their NEW PATENT TICKETING MA-HNERY, which is also another very wonderful piece of mechanical skill.

This machine will be in position in a few days, and will put the tickets on the spools at the rate of per minute, or will ticket 102,000 spools of cotton every day of ten hours. They will also introduce BOX MAKING and several other interesting processes in connection with manufacture of spool cotton. They will have on exhibition the handsomest case of Spool Cotton ever seen in Georgia, standing 20 feet high, and got up at a cost of nearly two thousand dollers.

They will also exhibit zeveral beautiful cases of Colored Spool Cottons, which for delicacy of tint and brilliancy of color have never been equaled by any other thread manufacturers.

The manufacturers of 0. N. T. will also exhibit their 100-Mile Monster Spools. The feat of winding thread on such enormous spools has never been successfully accomplished by any other thread makers.

They will also have on exhibition 10,000 Japanese Work Boxes, each box containing 8 spools of N. T. Cotton, which they will offer to the public at the low price of No cents each.

The manufacturers of CLARK'S O. N. T. SPOOL COTTON are preparing to distribute, FREE OF CHARGE, 100,000 sample boxes of this celebrated thread, which will be prepared in the building. The manufacturers of O. N. T. are in the proud position of being the largest manufacturers cool cotton in the world, giving emp ownest to upward of 6000 operatives.

The enormous increase in the demand for this celebrated thread has compelled the manufacture obtailed an addition to their present works in Newark, N. J., and next year, when completed, will given ployment to 1200 more operatives.

There are several brands of CLARK'S THREADS, and there is a very general impression amonamers in the south that O. N. T. is wound on black spools. In justice to themselves, the meacurers of O. N. T. beg to correct this very general mistake, and would state that the O. N. T. wound on WHITE SPOOLS, and the bottom label of every spool is branded O. N. T. NO THER IS GENUINE. It is the popular thread in all other parts of this great country, and it only requires to be bet known to become the popular Sewing Thread of the South.

GEORGE A. CLARK & BROTHER, 400 Broadway, New Yo-k, Sole Agents in America.
